

# VOLUNTEERS NEEDED

In the School of Health and Social Care, Teesside University and Centre for Oral Health Research, School of Dental Sciences, Newcastle University:

## **We are looking for:**

Expectant parents and parents of healthy infants aged 0-3 and/or 9-12 months who:

- Have no dietary restrictions
- Have good general health

To take part in a study to estimate the fluoride intake and excretion of infants living in the UK.

We would like you to complete a three-day diary of your infant's food and drink intake, provide small samples of any home-made food, collect urine and used nappies for two days, collect fingernail clippings and tell us about your infants tooth brushing habits.

**We will be happy to thank you for your help with the study with a £50 gift voucher on completion of the study**
